APPLICATION GUIDELINES

Inca Gold Frostguard - Liquid Toilet Deodorizer, Odor Control & Winterizer F-205

Inca Gold Frostguard - Liquid Toilet Deodorizer, Odor Control & Winterizer is a ready-to-use liquid concentrate solution that combines industrial grade propylene glycol for winterizing burst protection of up to -25°F, and liquid deodorizer for odor control of retention and re-circulating toilets when used as a precharge flushing medium.

Application Guidelines for Recirculating Toilets

1. **RINSE AND PREPARE** - Ensure that both toilet and holding tank are emptied and thoroughly rinsed before applying Inca Gold Frostguard. Drain and flush the toilet tank, operating the flush pump several times between tank draining operations to get contaminated fluid out of the pump cavity. Once clean, slowly add 1 gallon of fresh water to the tank. Operate the flush pump while adding water and if at first the pump only pulls air, add additional liquid to the toilet until the pump begins circulating fluid. When the pump flushes water with each cycle of the handle, stop adding fluid. Rinse drain valve.
2. **ADD INCA GOLD FROSTGUARD** - Slowly add 1 to 2 gallons of Inca Gold Frostguard to the toilet bowl until the flush pump produces a continuous stream of blue flushing fluid with each operation of the pump. Flush as many times as needed until the liquid color stabilizes to a uniform blue.

Important Notes

FREEZE VS SLUSH - With the Inca Gold Frostguard winterizing formula, the unit will continue to flush below freezing point, when ice crystals begin to form in the aqueous solution. Toilets recharged with Frostguard will ensure the flush fluids are protected from freezing in the tank, even when the fluids appear slushy, up to -25°F.

DISPOSAL - Inca Gold products are non-toxic, free of formaldehyde or other harmful chemicals, and approved for sewage treatment or disposal wherever dumping is allowed.

SANITATION - While Inca Gold may be one of the most powerful toilet deodorizers on the market, it is not to be used as a sanitizer. For your safety, please practice hygienic ownership of your portable toilet system.
