

Toll Blending and Private Label Services

A History Of Custom Solutions

Customers rely on our facility's 50+ years of expertise to improve operational efficiency and strengthen their bottom line. With our seasoned team averaging 18 years of experience, we deliver high-quality, custom chemical blends exactly when you need them—ensuring dependable performance, reduced complexity, and a smoother path to achieving your business goals.

TOLL BLENDING

Can be set up as turn-key, where we procure all raw materials and packaging and then blend, package and ship according to specs. Or the client can provide all raw materials and packaging and we blend and package according to specs, with shipping managed by the client or by us. Hybrid options also possible.

- **Liquid Chemical Blending** – This is our specialty, featuring multiple options including a heated 10,000-gallon stainless steel blend tank with the capacity to produce large-scale homogeneous batches and dilutions.
- **Powder/Dry Chemical Blending** – We offer select dry blending and packaging, including water soluble bag filling and packing for powders with outer foil.

CUSTOM CHEMICAL PACKAGING AND REPACKAGING

We package materials to specification, having close business relationships with major packaging and chemical suppliers, so if we don't have the size or style needed, we can get it. We furnish the facility and labor to repackaging bulk material into smaller containers or consolidate smaller containers into bulk.

- Filling and packaging options: 2 ounce bottle, quart, gallon, 5 gallon, 55 gallon, 275 gallon, 4,500 gallon tanker truckloads, and others upon request.

PRIVATE LABEL SERVICES

Our product mix is available for customers to help build their branding and increase revenue using a client's label, or our design team can create a custom-branded private label.

- ✓ **Shipping / Delivery** – We can usually ship within 3 business days. We can load client trucks or tankers with product, or use an approved common carrier. Our facility's location in Liberty, Missouri is in the heart of America, making for convenient interstate access throughout the U.S. for quick delivery on our customers' product needs.
- ✓ **Hazardous / Non-Hazardous** – We offer blending and packaging solutions for both hazardous and non-hazardous products.
- ✓ **SDS / Product Review** – We take safety seriously and have dedicated HAZMAT trained employees to ensure that our products are packaged and shipped safely, adhering to all local and federal regulations from OSHA and DOT. We provide safety data sheets specific to each blend.

We look forward to learning about your needs - call for a complimentary consult.
