

# Sewer Degreasing Agent

## Grease Release

With its unique blend of surfactants designed exactly for this, Grease Release tackles the problem of grease buildup in sewers by penetrating, softening and emulsifying FOG so it can be removed to flow all the way through sewer pipes to the treatment plant.

**Biodegradable • Non-caustic • Non-corrosive, • Contains no phosphates or hydrocarbons**

1. **Penetrates surfaces down to the pores** with a grease-repelling barrier that slows future buildup.
2. **Emulsifies and liquefies FOG buildup** on pipe surfaces so it will not re-solidify or re-adhere to pipes downstream. Treated grease will continue to break down after application.
3. **Pipe surfaces are left with a soapy residue**, making future cleaning easier and less frequent.

## Reduces Cleaning Costs

Cleaning with water dosed with Grease Release significantly **reduces cleaning cost per foot** because jetting with water alone takes much longer, uses more water, fuel and valuable crew time.

And because Grease Release also repels future FOG buildup, **it reduces the number of times that line needs to be treated each year.**

Using any jetter, mix or inject Grease Release into the jetter water during sewer cleaning.  
*Available in 5-gal carboys, or 55-gal drums.*

## Grease Release Metering System

Get the most out of every drop by using our Grease Release Metering System, engineered to deliver the exact concentration of Grease Release on demand with the turn of a dial.

Eliminates the expense of under- or over-application, and installs quickly and easily on any jetter truck.

## Lens Grease Release

Specially formulated for spraying on sewer camera lenses to repel grease for crystal clear viewing.

*Available in cases of (12) 2-oz bottles.*
